**Subject:** re: Military Department audit

### External Email

I just read the management letter for the WA Military Department.

I am interested in whatever additional detail is available related to the information technology contract issue cited on p 2-3. Things like when a contract was awarded, to whom and when was it negated and settlement paid etc.

It is hard to tell what year it occurred given the audit period is 2 years. There was no mention of pandemic so it does not sound like it involved any sort of emergency funding.

Thanks
